DETAILED ACTION

The art unit designated for this application has changed. Applicants(s) are hereby informed that future correspondence should be directed to Art Unit 1631.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 9-18, 21-28, and 33, drawn to a system, computer readable media, and method for making allele calls, classified in class 702, subclasses 19 and 27.
If this Group is elected, then the below summarized specie election is also required.
 - II. Claims 7, 8, 19, 20, and 29-32, drawn to a system, computer readable media, and method for interpreting nucleotide or amino acid information, classified in class 702, subclasses 19 and 27. If this Group is elected, then the below summarized specie election is also required.
 - III. Claims 34-63, drawn to a system, computer readable media, and method for obtaining an allele call report, classified in class 702, subclasses 19 and 27.

SPECIE ELECTION REQUIREMENT FOR GROUPS I and II:

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: Nucleic Acid.

Species B: Amino acid.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally

Art Unit: 1631

held to be allowable. Currently, claims 7, 8, 19, 20, 29 and 30 are generic to the above species. These species are distinct due to their respective critical features which are generally separately analyzed and published, and thus document the undue search burden if searched together.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. The inventions of Groups I-III are distinct inventions because they are directed to different methods regarding the critical limitations therein. For Group I, the critical limitation is a system, computer readable media, and method for making allele calls. For Group II, the critical limitation is a system, computer readable media, and method for interpreting nucleotide

Art Unit: 1631

or amino acid information. For Group III, the critical limitation is a system, computer readable media, and method for obtaining an allele call report. The completely distinct critical limitation of each Group supports the undue search burden if they were examined together. Additionally, each method of use have been most commonly, albeit not always, separately characterized and published in the Biochemical literature, thus significantly adding to the search burden if examined together as compared to being search separately.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157
